

## *Automatic Recall*

Allows you to place a call to the last number that called you. If you have Call Waiting on your line and choose not to answer, you may use this feature to call back that caller who beeped in.

- Listen for dial tone and press \*69 (or dial 1169 on a rotary phone)
- A recording will tell you what number called you and you may choose whether or not to return the call.
- If you would like to place the call, press or dial "1". Long distance or ECC charges may apply.
- If you do not want to return the call, simply hang up.

\*If the calling number was blocked on Caller ID, the recording will tell you the number was marked "Private", however your Automatic Recall feature may be able to call back the number without you knowing what it was. (Not available on all numbers).
